CORE SKILLS

Go (Golang)	TypeScript
JavaScript	SQL
Angular	React
PostgreSQL	Docker
Dokploy	Firebase
Linux / Git	Clean Arch

LANGUAGES

Spanish: Native

English: B1 (Technical & Professional)

PROFILE

Full-Stack Developer with hands-on experience building production-ready web applications, developer tooling, and scalable APIs. On the backend, specializes in **Go (Golang)** with Clean/Hexagonal Architecture, efficient concurrency, and RESTful APIs. On the frontend, builds reactive, performant user interfaces using **Angular** and **React** with Tailwind CSS. Proven track record of launching real-world SaaS platforms from requirements to deployment on Linux and Docker environments.

EMPLOYMENT

Full-Stack Developer

2023 – Present

Freelance / Independent | Mendoza, Argentina (Remote)

- Architected, developed, and deployed end-to-end production web applications, managing the complete lifecycle from requirements gathering to server deployment on self-hosted Dokploy and Docker.
- Mis Canarios (Production SaaS):** Engineered an all-in-one management platform for bird breeders using Angular and Firebase. Integrated recurring subscription monetization with Mercado Pago Checkout Pro and automated webhooks.
- ScraperHub (Production Web App):** Developed an on-demand web scraping platform and data marketplace in Go (Chi), featuring instant structured dataset extraction, freemium previews, and international payment processing via Lemon Squeezy.
- FDSTech (Production Platform):** Deployed a digital solutions platform integrated with n8n automated workflows for lead management, customer notifications, and task orchestration on self-hosted Linux infrastructure.
- Developer Tools & AI Agents:** Built open-source developer tooling and autonomous AI agents in Go: go-arch (architectural scaffolding framework with Clean/Hexagonal generators and MCP server support), GAIA (autonomous multi-agent coding assistant with SDD), and templ-islands (islands architecture library for Go SSR applications).

QA Tester & Technical Support Specialist

2023 – 2025

Dubbz | Mendoza, Argentina (Remote)

- Conducted manual, exploratory, and regression testing across web platforms to identify, document, and track software defects.
- Collaborated closely with cross-functional engineering teams to validate bug fixes and verify compliance with technical specifications.
- Managed Tier-1/Tier-2 technical support inquiries in a fast-paced environment, translating user feedback into actionable bug reports and product improvements.

EDUCATION

Associate Degree in Computer Programming

2019 – 2021

Universidad Tecnológica Nacional (UTN), Mendoza, Argentina

COURSES & CERTIFICATIONS

AI-Assisted Development & Agents – BigSchool (Brais Moure)

2026

Multi-agent architectures, Model Context Protocol (MCP), Spec-Driven Development (SDD), and prompt engineering.

Angular: The Complete Guide – Udemy

2023

Component-driven architecture, Reactive Forms, RxJS streams, Services & Dependency Injection, routing, and modular state management.
